

Draw a path from each airplane to its answer - don't crash into other clouds along the way

A vertical list of 22 airplanes, each with a number in a box to its left. The numbers are: 4, 19, 3, 20, 5, 22, 13, 15, 12, 23, 6, 14, 8, 17, 21, 9, 11, 18, 16, 10, 7, 2. To the right of the list are two clouds: one labeled 'DISPARI' and one labeled 'PARI'. The goal is to draw a path from each airplane to its corresponding answer cloud without crossing any other clouds.
